

APPLICATION SPOTLIGHT

PETROLMAXX®

► Fuel Transfer Trailers

Portable trailers are used in Agriculture, Industrial, Aviation and Military applications to assist with fuel transfer and dispensing. MP Petrolmaxx pumps are commonly used in this application to transfer fuel from one tank to another or to a nozzle utilized for dispensing. (ie: trucks, jets, farming equipment)

The MP/OB Solution:

The MP Petrolmaxx is available in multiple pump configurations based on the type of fuel you are dispensing (ie: Gasoline, Kerosene, Diesel Fuel, Ethanol, and Jet Fuel). Each pump is manufactured with a compatibility label specific to the fuel and motor configuration.

Additional product features include:

- Volute + wear plate material combinations configured for compatibility with the type of fuel being transferred.
- Flexible Drive Mounting options available: engines, electric motors, hydraulic and pedestal drives
- Self-priming pumps with flow up to 750 GPM and 225 feet of head
- End suction pumps with flow up to 925 GPM and 170 feet of head

	PO-SO	PG-SG	PE-SE
FUEL	Diesel, Bio-Diesel, Fuel Oil	Gasoline, AVGas, Kerosene, Jet A/8	Ethanol and E-85
